### **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3 - 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. With regard to claims 3 and 4, the phrase "said elements" lacks antecedent basis. With regard to claim 3, the phrase "suitable for wear" is unclear. With regard to claim 6, the phrase "said beam of light" is inconsistent with its antecedent. With regard to claims 11 and 12, the phrase "back of watch case" lacks antecedent basis; it is unclear whether the "whereby" clauses are intended to define structural limitations or merely are describing an intended result.

## Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Kondo. Kondo teaches a biometric measuring device that includes a rigid case having the claimed features of the case. Further, the claims merely require a case "operable for containing" certain claimed elements and the case of Kondo is capable of (operable for) containing a processing unit, optical source, and acoustic detector, including

Application/Control Number: 10/656,376 Page 3

Art Unit: 3735

sources and detectors having the features of claims 4 - 9. The device of Kondo includes timekeeping facilities and a display and allows optical and acoustic coupling between the bottom of the case and a wearer.

# Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kondo as applied to claim 10 above, and further in view of Mault et al. Kondo teaches a wristwatch-type biometric device that includes all of the features of the claimed invention except for a data output port. Mault et al. teach an alternate wristwatch-type biometric device that includes an IR download link (or others, as described) to allow data transmission to another device (paragraphs 0028 and 0031). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Kondo to include a data port, as taught by Mault et al., since this allows data transmission to another device.

#### Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mathews and Polak teach alternate wearable medical sensor arrangements.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric F. Winakur whose telephone number is 571/272-4736. The examiner can normally be reached on M-Th, 7:30-5; alternate Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ali Imam can be reached on 571/272-4737. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
